PROJECTS

Food Delivery (Mern)

A React-Node.js-MongoDB food delivery app enables ordering and viewing order history. Expressjs manages server logic, ensuring seamless communication between frontend and backend components

Expense Tracker (Backend)

using Nodejs, MongoDB, HTML, JavaScript, Expressjs, and Nodemailer to create an expense tracker that includes real-time updates for smooth financial management.

Genera Game (React)

Build an immersive game website with React, Tailwind CSS, and API integration. Users can click to access a game list, showcasing various games for an interactive and engaging experience.

Weather app (React)

Create a weather app with React and Tailwind CSS for a sleek UI. Fetch weather data from an API, display current conditions, and use Tailwind for responsive styling.

Lamp & luxury light (Frontend)

A lamp and luxury light website that is beautifully alive and made with HTML, CSS, JavaScript, and GSAP, you can improve spaces.
